Hi Mike,

I forgot to mention when I called this morning, that I talked to Nick Dudiak here in the office. He told me that there is a six foot drop off about 100 yards up from the mouth of the creek that is not passable by fish. I think it is pretty close to the little falls that you and I saw, but may be some what hidden from the air by overgrowth.

I hope your equipment made the trip up ok. Thanks again for contacting me for your study. I hope to do it again some time.

Tom Sigurdsson
